

Volume 22 (April 2017)

1) Algorithm for Graphically Monitoring for Congestive Heart Failure

Amber Hutchinson, 460

2) Weighted Dynamic Data Analysis in Obstructive Sleep Apnea

Clinton Nwanedo, 467

Volume 21 (April 2016)

1) Retained Signal Energy Based Optimal Wavelet Selection for Denoising of ECG Signal Using Modified Thresholding

Jason Jerwick, 446

Volume 20 (April 2015)

1) Using an Anisotropic-Diffusion Filter to Denoise MR Brain Images

Jen Finley, 436

Volume 19 (April 2014)

1) Surface EMG Acquisition Circuit De-noising Using LabView Filters

Matthew Forrest, 412

2) Wavelet Denoising of Simulated ECG Signal through Labview

Mark Dipsey, 419

3) Development of a Bioamplifier for use in a Surface Electromyography (sEMG) Based Biofeedback System

Miranda Gannett, 426

Volume 18 (April 2013)

1) Fuzzy Filtering Algorithm Using Labview Implementing Wavelet De-Noising Thresholding

Michael Berger, 394

Volume 17 (April 2012)

1) LabVIEW code for Modeling Room Reverberation with Impulse Response

Kevin Wenger, 381

2) A LabVIEW Realization of the Doppler Effect

Peter Orlando Weigel, 386

Volume 16 (April 2011)

1) Graphomathematical code for the characteristics of solar cells

Julio Rodriguez, 339

2) Feature Recognition Software using MFCC Algorithm

Eric Sweigart, 348

3) Color Manipulation in RGB Color Space
Jacob Vecht, 360

4) Synchronous Averaging Method Virtual Instrument
Nick Doo, 371

Volume 15 (April 2010)

1) Virtual Power factor Correction Instrument with a Variable Capacitor
Mike Quashie, 319

2) LabView Musical Synthesizer
C. David Gerlach, 326

3) LabVIEW Analysis of an Electrometer Circuit
Hal Rigley, 335

Volume 14 (May 2009)

1) Virtual Instrument to Characterize a Solar Cell
Ken Jackson, 308

2) Characterization of Solar Cell Capacitance Using Graphomathematical Code
Mark Musheno, 311

Volume 13 (May 2008)

1) Graphomathematical Audio Effects Processor
Nicholas J. Hinnerschitz, 286

2) A DSP Audio Crossover and Equalizer
Shawn Bialas, 300

Volume 12 (May 2007)

1) A Virtual Instrument for Image Resizing
Andrew J. Snyder, 250

2) A Virtual Instrument for Color Filtering or Enhancing
Andrew J. Snyder, 261

3) A Virtual Instrument for Adjusting Brightness
Andrew J. Snyder, 267

4) Method for Real Time Creation of Audio Visualization Using LabVIEW
Brandon Davis, 269

5) A virtual instrument for simulation of FM radio using the audible spectrum and an algorithm for frequency calculation in the time domain.
Ian M. Hughes, 274

Volume 11 (December 2006)

1) Virtual instrument for the study of Pericardial Friction Rub Heart Condition
Allen Yeung, 217

2) Virtual Instrument for Shifting the Pitch of a Sampled Waveform
Joshua L. Callen, 223

3) Virtual instrument for the study of Early and Late Systolic Heart Murmurs
Christopher C. O'Brien, 228

4) Virtual Instrument to study the Effect of Red Wine Consumption on the Heart
Courtney Dolan and John G. Stout, 236

5) A Graphomathematical Multi-Band Compressor
Greg K. Smith, 241

Volume 10 (May 2006)

1) Maze Solving Algorithm with Application in Image Processing
David E. Negro and K.H. Norian, 135

2) Virtual Keyboard Synthesizer
Satoshi Ebisawa, 142

3) Virtual Instrument for Face Recognition
Satiesh Muniandy, 145

4) A Graphomathematical Algorithm for an Animated Game with Artificial Intelligence
Jeff Karper, 154

5) A Golf Ball Flight Trajectory Simulator
Scott Boyle, 163

6) The Tic-Tac-Toe Game Implemented as a Virtual Instrument

Joseph V. Marranca, 168

7) Gaming Virtual Instrument

Brian Filizzi, 192

8) A Graphomathematical Approach for Characterizing and Comparing Signatures

Hillary J. Blenke, 194

9) Virtual Instrument for Detecting a Phonocardiogram Abnormality

Christopher M. Flouris, 203

10) Graphomathematical Code for Single Company Analysis

Ryan D. Goldenberg, 210

Volume 9 (November 2005)

1) Interactive Graphomathematical Guitar Tuner

Keith Painter, 44

2) Virtual Instrument for Near Real Time Input and Output

Keith Painter, 51

3) Voice Recognition Algorithm with Application to Mobile Robotics

David E. Negro, 57

4) A Graphomathematical Variable Play Rate Wav Player

Brian J. Filizzi, 63

5) A Virtual Instrument for Note Detection and User Controlled Pitch Shift

Jeff Karper, 67

6) Graphomathematical Echo Generator

Satoshi Ebisawa, 82

7) Characteristics of Laughter Waveforms

Sean Siegwart, 85

8) Virtual Instrument for the Simulation of an EKG Waveform

Daniel P. Monahan, 93

9) Graphomathematical Code for Simulating the Retinal Ganglion Cell in an Applied Steady-State Electric Field,

Matthew J. Chabalko, 96

10) A Graphomathematical Instrument for Text to Speech Synthesis

Dimitri Demergis, 106

11) A Graphical Technique for Characterizing Unique Letter Combinations
Hillary J. Blenke, 113

12) A Graphomathematical DSP Module for Guitarists
Samuel J. Philip, 117

13) A Graphomathematical Tremolo Effect for Guitarists
Samuel J. Philip, 121

14) A Graphomathematical Delay Effect for Guitarists
Samuel J. Philip, 124

15) A Graphomathematical Ten-Band Equalizer Effect for Guitarists
Samuel J. Philip, 127

Volume 8 (May 2005)

1) Graphomathematical Code for Music and Speech Discriminator.
Christopher Chojnacki, 5.

2) Graphomathematical Algorithm for the Study of Dolphin Underwater Communication.
Chris Eby, 14.

3) A Decibel Level Control System.
Ryan D. Goldenberg, 19.

4) Development of a Beat Detecting Virtual Instrument.
Keith Painter, 22.

5) Graphomathematical Algorithm for 13 Bit Binary Strand Decoding System.
Ryan D. Goldenberg, 31.

6) Algorithm for Controlling Duration and Pitch of a Sampled Waveform.
Ryan Hansen, 36.

Volume 7 (November 2004)

1) A Graphomathematical Drum Synthesizer.
Chris S. Gawryluk, 5.

2) The Effects of Lossy Compression Implemented as a Virtual Instrument.
Rob Dennis, 12.

3) Algorithm for Continuous Playback and Analysis of a Sampled Waveform.
Ryan P. Hansen, 25.

- 4) An Equalizer implemented using Graphomathematical Code.
Sam J. Philip, 29.
- 5) A Novel Graphical Display for the Short-Time Fourier Transform Using Graphical Mathematics.
Ryan Botzler, 32.
- 6) A Mathematical Algorithm for the Processing and Analysis of Whispered Vowels.
David Munsky, 39.
- 7) Simulating the steady-state behavior of an Avct-Pacemaker.
Sebastian P Sommer, 42.
- 8) Virtual Instrument for Speech Characterization.
Chris Eby, 46.
- 9) Graphomathematical Algorithm for Microphone Mismatch Correlation.
Dayne Mickelson, 50.
- 10) Formant and Anti-Formant Analysis of Consonant-Vowel Transitions in the English Language.
Christopher J. Florio, 55.

Volume 6 (May 2004)

- 1) An automated technique for feature extraction in second order differential waveforms of consonant-vowel transitions.
K.H. Norian , 5.
- 2) Synthesis, Equalization and Output of Audio Signals Using Graphical Signal Processing.
Juan F. Roche, 18.
- 3) Music Visualization using Graphical Signal Processing.
Katerina Karmokolias, 31.
- 4) Modeling electrical transmission lines using graphical mathematics.
Jason Haas, 47.
- 5) Audio Frequency Shifting Using Graphical Signal Processing.
Ryan Botzler, 57.
- 6) An Audio Compression Method using graphical signal processing.
William Bennett, 75.
- 7) Quadrature Amplitude Modulation (QAM) Model.

Shaun Elabdouni, 86.
